

# MANTISGUARD REGENERATIVE, L.L.C.

HEALTHY SOIL CREATES RESILIENT COMMUNITIES

## CAPABILITY STATEMENT

### COMPANY OVERVIEW

MantisGuard Regenerative is a Louisiana-based regenerative soil company that produces living biological soil inputs and delivers soil-biology planning, restoration, and education services. We help growers, agencies, and communities rebuild fertility, improve water retention, and sequester carbon by restoring the biology of the soil itself - not by adding synthetic inputs. Our model unites three offerings under one provider: biological products, technical consulting, and regenerative-agriculture education.

### CORE COMPETENCIES

- **Biological soil amendments** - worm castings (vermicompost), aerated compost extracts, and bioactive soil packs
- **Compost & vermiculture systems** - design, production, and ongoing management of living-soil operations
- **Soil-biology & regenerative-agriculture consulting** - assessment, planning, and restoration support for farms and land managers
- **Organic-waste diversion** - conversion of nonhazardous organic residuals into stable, beneficial soil products
- **Technical education & training** - compost tea, KNF/JADAM methods, beneficial insects, soil biology, and carbon sequestration

### DIFFERENTIATORS

- **Biology-first, founder-led** - grounded in living-soil science rather than chemical inputs
- **Locally produced, traceable inputs** - small-batch biology adapted to regional soils and conditions
- **Integrated provider** - products, consulting, and education delivered as one coordinated solution
- **Mission-aligned with federal priorities** - supports USDA/NRCS conservation and climate-smart agriculture goals
- **Agile & responsive** - a small business able to stand up pilot projects, demonstrations, and field trials quickly

### CAPABILITIES IN DEVELOPMENT

MantisGuard is scaling vermicompost and compost-extract production, conducting local product field testing, and developing USDA SBIR Phase I and NRCS Conservation Innovation Grant (CIG) proposals focused on biological soil restoration. Available now for pilot programs, demonstration projects, technical consulting, and supply agreements.

### COMPANY DATA

#### LEGAL ENTITY

**MantisGuard Regenerative, L.L.C.**

#### UEI (SAM.GOV)

**VXDSR2UVAWM1**

#### CAGE CODE

**Pending - SAM registration submitted**

#### BUSINESS TYPE

**Small Business**

#### ORGANIZATION

**Louisiana Limited Liability Company**

### NAICS CODES

**541620 Environmental Consulting Services (Primary)**

**325315 Compost Manufacturing**

**541690 Other Scientific & Technical Consulting**

**115112 Soil Preparation, Planting & Cultivating**

**561730 Landscaping Services**

**112990 All Other Animal Production**

**562219 Other Nonhazardous Waste Treatment**
